The Supplier shall arrange the Labour of unloading & shifting of the equipment to respective location.

A. FUNCTIONAL REQUIREMENT:

S. No	Required Pregnancies from Embryo	Estimated Qty.	Remarks	Place of Execution
1	Imported HF	140	The embryos of HF and Jersey would be fertilized using the conventional Semen. The pregnancy numbers for the breeds are mentioned to consider that the embryos of the breeds are to be preferably fertilized using Conventional sperms (unsexed)	Preferably: CCBF Andeshnagar (UP)
2	Imported Jersey	70		Optional: CCBF Alamadhi (Tamilnadu) & Dhamrod (Gujarat)
Total		210		

B. TECHNICAL REQUIREMENT: Donor & Dam requirement

Breed	First Lactation yield	Best Lactation Yield	Milk Fat%	Average Protein
HF	Above 12000	Above 18000	3.50%	Should be above in the exporting country
Jersey	Above 8000	Above 10000	4.50%	

➤ For imported embryos pregnancies establishment

- The average somatic cell count (SCC) of donor cow's or heifer's dam shall be below the prescribed limit average of the concerned breed in the exporting country or its appropriate breeding value or somatic cell score (SCS) may be considered if SCC is not available.
- Should have positive GEBVs (Genomic Estimated Breeding Values) for total milk yield, total milk fat and total milk protein and reliability of breeding value for these production characters shall be more than 80% for both HF and Jersey.
- should have positive GEBV for type characters like udder, feet and leg confirmation.
- Semen of sire used for inseminating donor cow or heifer (genomically tested or non-tested) for embryo production shall meet the specifications for semen as mentioned by Government of India.
- Donor shall be free from all known breed specific genetic disorders including Bovine Leukocyte Adhesion Disease (BLAD), Deficiency of Uridine Monophosphate Synthase (DUMPS), Citrulinemia (Deficiency of Argininosuccinate Synthetase), Factor XI Deficiency, Complex Vertebral Malformation (CVM) and Brachyspina.
